

CODE HAVEN

BROUGHT TO YOU BY
YALE STUDENTS

WHAT WE DO:

Code Haven is an undergraduate student organization at Yale University dedicated to introducing middle school students to computer science. Our weekly computing lessons include online lessons, group activities, and class-wide demonstrations.

OUR GOALS:

Yale has a wealth of computer science knowledge in its students, faculty, and resources. Our goal is to share that wealth, and to increase awareness of computer science in local schools

OUR RESOURCES:

Our Code Haven mentors are trained by Yale alum and Lead Program manager of TEALS Microsoft, Nathaniel Granor '09. Code Haven is funded by Google IgniteCS

for more information on our program, check out our website at:
